Summary

Detail-oriented Information Technology graduate majoring in Business Analytics, with hands-on experience in full-stack web development, database management, and system automation. Proven track record of delivering data-driven solutions and automated workflows through internship training and end-to-end software projects. Combines strong technical development capabilities with a solid foundation in business analysis, eager to contribute to an entry-level software engineering, web development, or business analytics role.

Technical Skills

- **Programming Languages:** PHP, Python, JavaScript, Dart, R, SQL
- **Web Technologies:** HTML5, CSS3, Tailwind CSS, Bootstrap, AJAX, DataTables
- **Frameworks & Libraries:** Laravel, React, Next.js, Flutter, Node.js
- **Database & Backend:** MySQL, Firebase, XAMPP
- **Data Analytics & Visualization:** Power BI, Microsoft Excel, Jupyter Notebook, amCharts
- **Tools & Platforms:** Git/GitHub, VS Code, Figma

Experience (Internship/OJT)

Software Developer Intern | Arktech Philippines, Inc. | Internship | Feb 2026 – May 2026

- Developed "Mieruka Board," a comprehensive web dashboard that visualizes cross-departmental KPIs and performance metrics to drive data-driven decision-making.
- Integrated interactive charts with the company's existing PMS database, delivering tailored analytics and performance insights across all teams.
- Engineered the Arktech Recruitment System, an end-to-end Applicant Tracking System (ATS) designed to automate the hiring workflow from sourcing to onboarding.
- Leveraged the OpenAI API to implement intelligent, automated parsing of external job applications, significantly reducing manual data entry.
- Built automated email workflows and dynamic applicant portals, ensuring seamless data synchronization with the internal HR database.

UNIVERSITY PROJECT

GoBuddy: A Travel Platform That Promotes Lipa's Tourism By Leveraging Analytics | Full-Stack Developer

Technologies: Laravel, Tailwind CSS, MySQL, JavaScript, Livewire, Blade

- Developed a full-stack tourism platform for the Lipa City Tourism Office, enabling centralized management of tourist attractions, businesses, and user data using Laravel MVC architecture.
- Built secure CRUD dashboards for administrators, businesses, and users, including authentication, role-based access, approvals, and account management.
- Implemented interactive analytics dashboards with data visualizations to monitor tourism performance, visitor trends, sentiment analysis, and business contributions.
- Designed responsive and dynamic user interfaces using Livewire, Filament, Blade, and Tailwind CSS, ensuring seamless usability across desktop and mobile device

Education

Batangas State University TNEU – JPLPC Malvar Campus

Bachelor of Science in Information Technology – Major in Business Analytics

Certifications

- **CISCO:** Introduction to Data Science | Data Analytics Essentials | Data Science Essentials with Python
- **Google:** Share Data Through the Art of Visualization (Google Data Analytics)
- **Conferences & Workshops:** Batangas Information Technology Conference (BITCON) | Language Legacy: Python Programming and Figma Design
